Andrei Robachevsky
robachevsky@isoc.org

Why MANRS Observatory?

Inform MANRS members about their degree of commitment

- Improve reputation and transparency of the effort
- Facilitate continuous improvement and correction

Provide a factual state of routing security as it relates to MANRS

- Support the problem statement with data
- Demonstrate the impact and progress
- Network, country, region, over time

Improve robustness of the evaluation process

- Make it more comprehensive and consistent
- Reduce the load
- Allow preparation (self-assessment)

Overview

State of Routing Security

Number of incidents, networks involved and quality of published routing information in the IRR and RPKI in the selected region and time period

Incidents

Route misoriginations	314
Route leaks	53
Bogon announcements	707
Total	1,074

Culprits

Culprits	802
----------	-----

Routing completeness (IRR)

Unregistered	134,120	12.6%
Registered	927,137	87.4%

Routing completeness (RPKI)

Valid	349,800	33.0%
Unknown	706,067	66.5%
Invalid	5,390	0.5%

Measurements(<https://observatory.manrs.org/#/about>)

Action	Measurement	Data source	Caveats
Filtering <i>M1, M1C, M2, M2C</i>	Route hijacks and leaks	BGPStream.com CAIDA GRIP	False positives, obscure algorithms, vantage points
Filtering <i>M3, M3C, M4, M4C</i>	“Bogon” announcements	CIDR report	Limited vantage points
Anti-spoofing <i>M5</i>	Negative tests	CAIDA Spoofer	Sparse, active
Coordination <i>M8</i>	Registered contacts	RIRs Whois DBs (RIPEStat), PeeringDB	Stale/non-responsive contacts not detected
Global validation <i>M7IRR, M7RPKI, M7RPKIN</i>	Coverage of routing announcements	IRRs, RPKI (RIPEStat)

New Data Source, Feedback Loop Enhance MANRS Observatory

The MANRS Observatory monitors Internet routing security by aggregating data from trusted sources into a user-friendly dashboard to help network operators improve the security of their networks.
